

Progress in delivery of strategic outcomes

"People in Midlothian will lead longer and healthier lives by getting the right advice, care, and support, in the right place, at the right time."

The Adult Health and Social Care service continues to undergo redesign as required by the Integration agenda. The 2016-19 Strategy and 2017-18 Delivery Plan outlines a major programme of service changes designed to promote prevention and recovery. The enablers to achieve include improved partnership working, public engagement and working with communities. The three major programmes of redesign are Learning Disability Day Services, Care at Home, and Care Packages.

1. Integration: The Integration Joint Board (IJB) produced and published its first Annual Report, including a summarised version, in August 2017. Work is underway to develop a Property Strategy working closely with NHS Lothian and Midlothian Council. A partnership Workforce Framework has been developed and approved in principle by the IJB. At a service level the Wellbeing Service is now fully established in 8 Health Centres and is subject to full evaluation supported by Healthcare Improvement Scotland. A new project is underway, supported by the national Collaborative Leadership programme, to develop stronger locality working. This is taking place in Penicuik focussing upon services to people who are housebound.

2. Older People: The Ageing Well project continues to provide a broad range of health promoting activities through having a committed and diverse volunteer pool who are active within the community. The publication of Scotland's third dementia strategy and publication of the Scottish Governments findings from the independent evaluation from testing the 8 pillars model of community support for people with dementia has resulted in the establishing of a Dementia Steering group to provide strategic oversight and direction to the delivery of dementia care within Midlothian. The shift in the balance of care towards providing more care at home has experienced success and failures over the past year. Projects which aim to improve the coordination care across primary and social care are set up. The lack of capacity to provide care at home is impacting on those people delayed in hospital. Newbyres has seen the introduction of nurses and has developed two dementia wings totalling 24 beds. There are plans to increase the amount of extra care housing in Midlothian following the success of Cowan Court. Improving the quality of care in care homes continues to be supported by a Care Home Nurse advisor and the introduction of Video conferencing to support training across care home staff that has already provided training to over 300 staff.

3. Learning Disabilities: A Day Services Policy and Strategy has been approved by Council and work is commencing on its implementation. As part of this work a number of 'expert panels' will be held which will allow a full range of stakeholders to help shape Day Service provision going forward. Teviot Court, the development of 12 houses for people with complex care needs in Penicuik, is complete and being occupied in a phased approach.

4. Physical Disabilities/Sensory Loss: The JPDPG (Joint Physical Disability Planning Group) continues to focus on improving the availability of information and effective communication. A communications group has been formed to ensure a brief newsletter follows each planning group meeting. This will be shared with a wide audience, keeping them updated on the work being undertaken and encouraging input and exchange of ideas. Social media is now also being utilised through the Council Facebook page. The proposed training of volunteers by Audiology took place on 4th May and 15th August, with around 15 people attending to be shown how to do basic maintenance and repair on hearing aids. Repair and maintenance is now however also being provided as part of the Adult Audiology Clinic at the Community Hospital in Bonnyrigg which commenced on the 25th September. Awareness training sessions are ongoing, having recently been delivered to Midlothian Firefighters. This highlighted the risks associated with sensory loss to be considered and recorded during home safety visits. It is also the first step to encourage increased referrals between our two organisations. The consultation on the British Sign Language National Plan closed at the end of May with publication due shortly.

5. Self Directed Support: Work is continuing to embed Self Directed Support into a 'business as usual' activity. Ongoing service development is taking into consideration the requirements of Self Directed Support. Work is being progressed to help individuals to make use of direct payments by making it easier to identify and employ perspective personal assistants.

6. Substance Misuse: Funding for the development of a Recovery Hub which will bring together mental health, substance misuse and criminal justice services, including third sector partners, has been approved by Council. The hub reflects the wishes of people with lived experience to have better co-ordinated, easily accessible services that reduce the need to repeat their stories. The Hub will strengthen the partnership's core priorities which is to develop a more effective Recovery Integrated System of Care (ROSC). Peer support through peer workers, volunteers and mentors will be an integral part of the Recovery Hub. The Care Inspectorate report on the work of the partnership noted 30 strengths, one of which was, *'It was evident that service users were offered high quality, evidence informed treatment, care and support interventions'*.

7. Criminal Justice/Community Justice: An additional social worker has been appointed to Criminal Justice Social Work providing team capacity to work with domestic abuse perpetrators on a voluntary basis. This will coincide with the introduction of Safe and Together in Midlothian early next year. Safe and Together provides a framework for partnering with domestic violence survivors and interviewing with domestic violence perpetrators in order to enhance the safety and wellbeing of children. In Edinburgh Safe and Together works in partnership with the Safer Families service which picks up the work with perpetrators identified by Children and Families staff. The Midlothian perpetrator work will be based on the interventions used by Safer Families in Edinburgh. Community Justice Scotland representatives visited Midlothian on the 7th August 2017. They attended the Community Justice Working Group and then held a separate meeting to provide feedback on the Midlothian Community Justice Outcomes Improvement Plan. The feedback was positive and improvement recommendations incorporated into the plan when it is refreshed for 2018/19.

8. Mental Health: Attendance at the two Mental Health Access Points in Penicuik and Bonnyrigg has exceeded expectation and continues to grow. Around 2% of the adult population of Midlothian used the service in its first year of operation. Staff at the Access Points guide people to access the support they need to increase their mental wellbeing; reducing low mood and feelings of stress. 71 Community Services and resources have been signposted/referred into and over half of those who have attended have been offered assessment for psychological therapies. The Wellbeing Service in 8 GP practices is assisting many people to access self-help resources and quicker access to psychological therapies. 80% of the referrals made by GPs have a strong Mental Health component. A Triage project with Police has been introduced to ensure that people in crisis get quick access to the right type of support, including a place of safety.

Emerging Challenges and Risks

Funding Pressures

1. There is a continuing requirement to seek major efficiencies despite the growing demand, particularly in relation to older people and those with complex needs. The service was overspent primarily as a result of some very high care packages and work is being undertaken to find more cost effective ways of providing care. The move towards an integrated budget through the establishment of the Integration Joint Board provides an opportunity to make better use of collective resources.

Capacity and Quality of Services

1. MELDAP face the significant challenge of managing a 23% reduction in Scottish Government funding. Its Strategic Group was clear that priority was given to sustaining the Recovery Orientated System of Care (ROSC) which meant that funding reductions to recovery orientated services were kept to a minimum with no reduction in funding for peer support workers.

2. The ongoing shortfall in care at home capacity has been difficult to manage and has had a knock-on impact on the Reablement Service as the limited capacity of external providers has impacted the ability to move people following their period of reablement. The longer term viability of services in both care homes and care at home services requires a long term approach to workforce planning and the promotion of social care as a career, and this work is being undertaken on a multi-agency basis involving NHS Lothian and the Third Sector. The decision to fund the Living Wage in the care sector also provides an opportunity to create a more sustainable and stable workforce. Two care homes remain under large scale investigation.

3. Aspire has ceased its care at home contract with Midlothian Council and from November 2017 the service provided by Aspire will transfer to one of our other contracted service providers. We are working closely with Aspire and our existing service providers to put new care arrangements in place and minimise the impact on service delivery.
